

Why are Iraqi subscribers relying on 2G & 3G networks?

Iraqi subscribers have been relying on relatively old 2G and 3G networks for their voice and data connectivity. This delay in adopting new technologies is attributed to many factors including social, political, and religious considerations. The tight regulatory measures by the CMC do not simplify problem.

Who owns Zain Iraq?

Ownership: Zain Iraq is part of the Zain Group, a Kuwait-based telecommunications company. It's one of the leading mobile operators in Iraq. Services: Zain Iraq offers mobile voice and data services, including 3G and 4G data services. They also provide value-added services, international roaming, and mobile banking.

Does Iraq need a 4G network?

Iraq with its size and large population has the possibility to be one of the leading markets in the region, akin to the Egyptian market. However, up to this moment, it has to rely primarily on 2G and 3G services while the 4G network is progressively being deployed.

Is Iraq a good place to invest in the telecom sector?

In particular, the telecom backbone has suffered significantly from the succession of adverse events in the country. On another note, the telecom market in Iraq is one of the most promising, where the increased adoption of mobile services could open the door for important investments in the country's telecom sector.

What is 2G & how does it work?

2G, first introduced in 1992, is the second-generation of cellular telephone technology and the first to use digital encryption of conversations. 2G networks were the first to offer data services and SMS text messaging, but their data transfer rates are lower than those of their successors.

Is telco a good investment in Iraq?

On another note, the telecom market in Iraq is one of the most promising, where the increased adoption of mobile services could open the door for important investments in the country's telecom sector. The telco space is regulated by the communications and media commission (CMC).
