India: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The Ministry of New and Renewable Energy stated that India had received about 5,000 trillion kWh of solar energy over its land. India has very few sources of fossil fuels which compels the country to be highly dependent on gulf countries. Solar energy can be the most secure source as it is abundant.

Established in the year 2019, we "360 Energy" are a prominent firm that is engaged in Manufacturer a wide range of Solar Panels, Grid Solar Power System, Solar Panel, etc. Located in Vapi (Gujarat, India), we are a Proprietor firm and manufacture the offered products as per the set industry norms.
