Agenos Energy and CGES AD Podgorica have joined forces to build and connect an 87.5 MW solar park in Vraćenovići, Montenegro, near the border with Bosnia and Herzegovina. The project, which is expected to be operational in 2028, will be connected to the grid via a new 220/110 kV substation in Vilus, which will also supply other solar plants ...

Hungary is an excellent example: its combined per capita electricity generation from wind and solar sources has consistently been among the lowest in the EU since 2010 (Eurostat, 2017). 1 This is surprising because-seen from a distance-Hungary does not look like the most inhospitable place for wind and solar energy within the EU. There are many more ...

Hungary: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
