

What is AlsoEnergy's full-stack technology platform?

From our edge solutions to our cloud application, AlsoEnergy's full-stack technology platform meets all your needs for monitoring, managing, and monetizing your growing clean energy portfolio.

What is the main source of energy in Uruguay?

Fossil fuels are primarily imported into Uruguay for transportation, industrial uses and applications like domestic cooking. Four hydroelectric dams provide much of the country's energy supply. Historically, energy has been a stronghold of state-owned companies, such as UTE and ANCAP.

Is Uruguay a petroleum importing country?

Uruguay is a petroleum - importing country, and most of the industry is controlled by the state owned industry ANCAP. ANCAP operates both the only refinery in Uruguay, La Teja Refinery and the distribution of gas within the country.

Why are fossil fuels mainly imported into Uruguay?

Fossil fuels are largely imported into Uruguay for transportation and industrial uses. The high import costs, and the rapid transition to renewables on the electricity grid has increasingly made fossil fuels less important. Uruguay is a petroleum - importing country, and most of the industry is controlled by the state owned industry ANCAP.

People like AlsoEnergy's dedicated customer support and technical services team members. When you partner with AlsoEnergy, you benefit from complete access to the combined resources of a global organization that brings hands-on knowledge about edge solutions, cloud software, clean energy, electrical engineering, grid operations, and more. ...

Uruguay Renewable in % Electricity Production. The target set in the National Energy Policy 2005-2030 to reach a 50% share of renewables in total primary consumption in 2015 (compared with 35% in 2005) was achieved in 2014 with renewables accounting for 53% of the primary consumption; the additional goal of 1.2 GW of wind capacity was reached in 2016.

Avalon BioEnergy Uruguay, a subsidiary of Avalon Energy Group LLC, is launching Latin America's first integrated Agriculture-Sustainable Aviation Fuel (SAF) biorefinery in Uruguay. The project is supported by Uruguay's Ministry of Environment and will offer up to an 80% reduction in emissions compared to traditional jet fuels.

relatively important energy exchanges for Uruguay. Take into account that the Electricity System of Argentina and Brazil are, respectively, eleven and fifty times larger than that of Uruguay. In Uruguay, the optimal economic dispatch of generation resources is carried out by assimilating the . forecast information of the water

inflows to the dams

Pat King is Vice President of Sales for AlsoEnergy and brings his passion for developing effective sales and operation teams to execute winning revenue strategies. Pat has worked in the renewable energy industry for the last decade starting at Suniva, a solar cell and module manufacturer as Vice President of Sales and then transitioning to ...

PowerTrack, AlsoEnergy's flagship application now on the Athena platform, is the all-in-one solution to the challenges of monitoring, controlling, and optimizing your entire clean energy portfolio. If you're adding already-installed renewable ...

Back in 2007, Uruguay had a massive problem with no obvious fix. The economy of this country of 3.5 million people was growing, but there wasn't enough energy to power all that growth.
