Can solar power be used in Antarctica?

Although advancements in technology are now making solar a more viable option for use in the polar regions, there is already a history of solar power supporting scientists in the Arctic and Antarctica. For example, the British Antarctic Survey's Halley VI research station is powered by a combination of solar panels and wind turbines.

Can solar panels run in Arctic and Antarctica?

In fact, some studies suggest that cooler temperatures can help solar panels run more efficiently. Instead, solar panels rely on solar radiation to produce energy. So, the question isn't whether the Arctic and Antarctica are warm enough, but whether they get enough sun exposure. The fact is that we can use solar panels at the poles.
