

What is Aramis & how does it work?

Aramis is a public-private partnership between the state-owned corporations Energie Beheer Nederland (EBN) and Gasunie, and the private companies TotalEnergies and Shell. The project will bring together each partner's technical expertise, experience, and knowledge of CCS to deliver a decarbonisation solution for our customers.

What is the Aramis project?

The Aramis project, a collaboration between TotalEnergies, Shell, Energie Beheer Nederland (EBN) and Gasunie, aims to make a significant contribution to the energy transition by reducing CO<sub>2</sub> emissions for the hard-to-abate industries.

How can Aramis help businesses achieve net-zero emissions by 2050?

Many businesses aim to achieve net-zero emissions by 2050 or sooner. Aramis wants to support these ambitions by providing CO<sub>2</sub> transport to unlock storage capacity for parties that seek emissions reduction by means of CCS at scale. Do you want more information about CCS and the energy transition? Visit our [linkpage](#).

Does Aramis have a contract with JGC-s consortium?

JGC-S Consortium has awarded a significant contract to Aramis for Commissioning of Nghi Son Refinery Process units. This contract comes as continuation of the earlier contract running since December 2015 for pre-commissioning and commissioning of the refinery Utilities. Download our brochure!
