

What type of power socket does Armenia use?

Armenia operates on a 230V supply voltage and 50Hz. In Armenia the power sockets used are of type C and type F. Use the photo below to help identify the right plug and socket. Plug adapters are the interfaces between the American flat-pronged plug and Armenia's two round-prong socket.

Can I use a travel adapter in Armenia?

This normally includes the use of a travel adapter, which is a device that simply allows you to plug any US electrical appliance into a foreign electrical socket. It is important to note that it does not convert the voltage or frequency. For Armenia, there are two associated plug types: type C and type F.

What voltage does Armenia use?

Armenia operates on a 230V supply voltage and 50Hz. Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply.

Do I need a voltage converter in Armenia?

You can use your electric appliances in Armenia, if the standard voltage in your country is in between 220 - 240 volts. Manufacturers take these small deviations into account. If the standard voltage in your country is in the range of 100-120 volts, you need a voltage converter in Armenia.

What type of plug does Armenia use?

For Armenia, there are two associated plug types: type C and type F. Plug type F is the plug which has two round pins with two earth clips on the side. Armenia operates on a 230V supply voltage and 50Hz. In Armenia the power sockets used are of type C and type F. Use the photo below to help identify the right plug and socket.

Where can I find elbat batteries in Armenia?

Armenia, Yerevan, 37/29 Sharuri St. Tel.: +374 10 461 949 E-mail: info@elbat.am Web-site: [Products](#)
Conventional automotive batteries ELBAT conventional lead-acid vehicle batteries are based on a technology used over 100 years. Low cost and promising energy carrier available in wide Ah ranges from 50Ah to 110Ah for standard vehicles.
