Rapidly swirling, high-energy air is the key to the Fury burner's efficient combustion. The swirling air and flame are created by the fixed internal spin vanes, high-pressure blower, and high-velocity nose. The Astec designed pre-filming fuel nozzle uses the combustion air from the high-pressure blower to atomize fuel.

Established in 1992, AZTEC has grown from a two-person, DBE firm into a corporation with offices throughout the US. In 2006, we became part of TYPESA Group, an international firm with 46 offices, 3,300 employees and annual revenues of over \$345 million - a testament to AZTEC's long-term, financial stability and reputation.
