Automate solar panel on drawer slide (12v) I'm stuck...need to open/close a drawer (40" distance) remotely. It slides out like butter so very little resistance at play. I built a roof rack with two solar panels stacked on top of eachother, the bottom one pulls out on drawer slides.

Hi everybody. I'm looking to automate the production of hot water with solar panels, and use the excess to support the UFH. I've installed shelly temp sensors in solar panel, and hot water tank, and shelly actuator to turn the pump on, I also have a three way valve that will divert the solar circulation to UFH tank when the water for bathing temp is enough. all sensors ...

The monosilicon/crystal solar panel provides power in varied conditions including low light situations. Panels can also be wired in parallel to provide additional power for

As others have said, you need to use logic chips. Check the unofficial wikki Solar Logic Circuits Guide. The simplest is the: &quot;4-chip 1-sensor 1-axis Approximate Solar Tracking&quot; which is appropriate for the moon and space as it tracks the sun across 1 axis in the sky and so is appropriate for the moon and space. Other planets require more complex logic circuits as the ...
