

Is basquevolt developing a solid-state battery?

Basquevolt reports progress in the development of its solid-state battery cells. Before the end of this year, Basquevolt's research and development centre is expected to produce the first 20 Ah cells suitable for use in electric vehicles.

Will basquevolt reduce its cost compared to today's lithium-ion batteries?

Basquevolt is talking about a potential cost reduction of 30 per cent compared to today's lithium-ion batteries. Basquevolt was only founded last year and is already planning to start mass production of solid-state cells at its future 1 GWh capacity plant by the end of 2025.

Why are batteries made in the Basque Country?

In sum, the batteries made in the Basque Country will offer greater energy density at a lower cost, which will allow for the manufacture of vehicles with greater range and a lower price. These are the two key elements necessary to guarantee a "comfortable" transition from fossil-fuel vehicles to electric ones.

What is basquevolt?

BASQUEVOLT. BASQUEVOLT aims to become the European leader in the next generation of solid-state lithium batteries. Our technology will make possible the mass deployment of electric transportation, stationary energy storage and advanced portable devices.

When did basquevolt launch its innovation center?

June 23, 2023: Basquevolt, the solid state lithium battery developer and manufacturer, inaugurated its innovation center in mid-June in an official ceremony presided over by the president of the Basque government, Iñigo Urkullu and the company's investment partners.

Who is basquevolt backed by?

Basquevolt is backed by a strong group of shareholders. Major industrial players in the energy and automotive sectors, together with the Basque Government. We are looking for talented people with experience in battery technology to share our ambition to build a sustainable world.

The research team led by Professor Armand has been able to improve the composite polymer electrolytes (technology he discovered in 1978) and solve the main solid-state battery challenges. This unique technology brings lithium batteries beyond ...

June 23, 2023: Basquevolt, the solid state lithium battery developer and manufacturer, inaugurated its innovation center in mid-June in an official ceremony presided over by the president of the Basque government, Iñigo ...

Some of the best battery brands available in South Africa are listed below. Dyness. PylonTech. BYD. Shoto. HinaESS. Hubble. Freedom Won. Livolttek. Tesla Powerwall. Now read: Brace for stage 9 ...

Basquevolt's prototype plant for manufacturing solid-state batteries in Spain. Image: Basquevolt. Spain and the Netherlands have launched subsidy schemes to support domestic manufacturing of clean energy technologies, including batteries and solar PV modules.

Telefónica and Siemens digitalise Basquevolt´s solid-state battery cell prototyping plant. Basquevolt will evaluate various digitalisation processes related to the production of solid-state lithium batteries, providing the plant with the best technological solutions. Telefónica an...

The BASQUEVOLT Board of Directors met today for the first session of the year for the presentation of 2023 Strategic Plan with the main growth milestones expected for the coming months. Among them, the opening of the new R& D Center next April is particularly relevant for the company will be located in the former building of the Basque Formula 1 project, Epsilon ...

Basquevolt, the Basque solid-state battery initiative, will begin production of battery cells in 2027 with the aim of reaching 10GWh capacity, after its creation was signed today. This is one of the main objectives set out in Basquevolt's articles of association, which include as founding shareholders the Basque Government, through the venture ...

Step into a future. where energy is tailored around your needs. With local lithium-ion battery assembly, Bluevolt offers a power system that fits your budget and supports your lifestyle. Embrace new ways to manage power outages and load shedding with a reliable backup power system. Get genuine technical support from our local South African team, the same minds ...

BASQUEVOLT is an ambitious project focused on the production of solid state cells that aims to be a reference gigafactory in Europe in this type of batteries with an estimated production of 10GWh in 2027.. In line with the European Battery Strategy, driven by Commissioner Maro? ?ef?ovi?, BASQUEVOLT will work with other European partners to accelerate the ...

The third round of South Africa's battery energy storage programme has attracted 33 bids from prospective independent power producers. Tagged with: Power. South Africa. Want to read more? Free. Login to read this article. Subscribe to African Energy. View subscription options.

Wh/l and 450 Wh/kg), while significantly reducing overall battery pack costs. BASQUEVOLT battery cells can be produced through a more efficient less complex process, creating a 30% reduction in the capital investment needed per GWh in a gigafactory and 30% less energy used per kWh produced, compared to lithium-ion ...

In the era of renewable energy and electric mobility, the demand for high-performance battery technology has never been greater. As the driving force behind the transition to sustainable energy solutions, battery gigafactories stand at the forefront of innovation, efficiency, and excellence in construction, design, and engineering.

This "A- Sample Line" has managed to produce the first 20Ah cells and is expected to be able to manufacture 80Ah cells by the end of this year; The plant was built in just 8 months, covers 4,500m² and has the capacity to house 80 ...

BASQUEVOLT, a specialist in solid-state technology for mobility and stationary energy storage applications, backed by EIT InnoEnergy, the innovation engine for sustainable energy supported by the European Institute of Innovation and Technology, an institution of the European Union, has revealed its research and development centre will deliver 100% ...

Basquevolt has unveiled its innovation centre with the promise to deliver 100% European solid state battery technology by the end of 2023. ... North America Europe & UK Indian subcontinent Asia Africa & Middle East Central & Latin America Oceania ... Solid state battery developer Basquevolt has unveiled its innovation centre with the promise to ...
