

What is the Collie battery project?

the Collie battery project will ensure the security and reliability of WA's energy system. Credit: Synergy. Synergy has begun the installation of the first battery units at its 500MW/2 gigawatt hours (GWh) Collie battery energy storage system (BESS) in Western Australia (WA). The initial 80 units are part of a larger plan for 640.

When will the Collie battery project become operational in Australia?

The 500MW/2GWh facility in Australia is scheduled to become operational in 2025. the Collie battery project will ensure the security and reliability of WA's energy system. Credit: Synergy.

What is the Collie battery energy storage system (cbess) project?

In line with the WA State Government's decarbonisation strategy to be delivered by 2030,our Collie Battery Energy Storage System (CBESS) Project forms part of Synergy's decarbonisation strategy. Coal-fired power generation is being replaced with renewable energy generation infrastructure and energy storage solutions.

How many batteries are there in Collie?

The first 80 units are now in place,with the entire system to include 640 unitswhen complete. The Western Australian Government said that construction on the battery system is creating around 500 jobs in Collie - providing a major economic boost.

Why is the Collie battery so important?

"The Collie battery will be one of the biggest in Australia,and means we can deliver clean,affordable and reliable energy for WA for decades to come. "Importantly,this big battery keeps Collie at the heart of our energy system,supporting local jobs and ensuring a strong future for the town."

How long does a collie battery last?

The big battery offers 197 MW of storage capacity for 4 hours,while being charged up during the day and later discharging during peak evening hours. The Collie battery also comes as a means to address risks related to the retiring of the state's coal plants and the jump in residential and commercial rooftop solar,as identified by the AEMO.

Synergy previously said that the Collie BESS project could be expanded to 1,000MW/4,000MWh if market forces make that viable. Construction started on the BESS in March 2024 and it is hoped it will connect to the grid in ...

Synergy has awarded the \$160 million contract for the delivery of civil, electrical and major equipment installation works for the Collie Battery Energy Storage System (CBESS1) to a Perth contractor.

The 219 MW / 877 MWh battery storage facility, currently the largest in the state, began delivering grid reliability services to the Australian Energy Market Operator on October 1, 2024. Located near the town of Collie on Wilman country of the Bibbulmun nation, the battery was completed in less than 18 months from the start of construction.

The Collie Battery Stage 1 project is a terrific example of this, involving excellent collaboration and innovation between Western Power and Neoen, resulting in an outstanding outcome for the community and the WA energy market. Connecting energy solutions that support the harnessing of the abundance of renewable energy resources WA has to offer ...

SCEE Electrical has been awarded a A\$50m (\$33.74m) contract for switchyard works at Collie's big battery storage system in Western Australia (WA). ... "As we move to renewable energy and battery storage, this project adds to the legacy of a community who is committed to playing its role in the future energy needs of the state."

Battery energy storage systems like Synergy's Collie Battery and Kwinana Battery Phase 1 and 2 are vital in the transition. In addition to the government-owned storage systems, Neoen is building a big battery project in Collie.

The first battery units have been installed at Synergy's \$1.6 billion Collie BESS (battery energy storage system), which is set to be one of the largest in Australia. The Collie BESS is schedule to be connected to the grid in ...

Client: Synergy Location: Collie, WA Market: Renewables Capabilities: E& I Construction In May 2024 SCEE Electrical was awarded the Balance of Plant ("BOP") contract for Synergy's Collie Battery Energy Storage System, a key project in Western Australia's decarbonisation strategy, supporting the transition from coal to renewable energy.

The project encompasses the installation of 219MW / 877 MWh battery of Tesla Energy Megapacks, coupled with the establishment of a new 33/330kV High Voltage (HV) Substation. ... Work at Collie Battery Stage 1 commenced in April 2023 and is expected to finish later this year. Latest news. View more news. Loading... Delivering for Australians ...

Collie Battery Energy Storage Project Location. The Collie Battery Energy Storage System will be located around 13km north-east of Collie town, nearly 200km south-east of Perth. The site is near the Collie Power Station on land ...

Collie, a vibrant town in Western Australia, is poised to revolutionize the energy landscape with an ambitious big battery project. Designed to fortify the Southwest Interconnected System (SWIS) that supplies power to Perth and over a million residences and businesses spanning vast regions, this cutting-edge initiative is set to bring numerous economic opportunities to the region.

The Neoen Collie battery has actually been operating since October 1, and is the company's first four hour battery, and its first in Western Australia's main grid, known as the South West ...

The Collie Battery could be as large as 1 GW, though it is likely to be built in separate stages of 200 MW each. Once completed, a 200 MW battery and associated infrastructure takes up to 5 hectares of land and a 1 GW battery requires about 25 hectares of land. The battery cubicles are normally around 2.5 meters tall.

The first stage of Neoen's Collie BESS (battery energy storage system) has commenced operations ahead of schedule. Since 1 October 2024, the battery has been delivering grid reliability services under contract with the Australian Energy Market Operator (AEMO) - less than 18 months after the project began construction.

Less than 18 months after construction started, Neoen has announced that the 219 MW / 877 MWh first stage of its Collie battery energy storage project is successfully operating and delivering critical grid-support services to Western Australia's (WA) main grid.. Neoen said the four-hour battery, located near the town of Collie which has long been home to WA's coal-fired ...

This project is very dear to me and the entire process has been exciting and amazing. Shout out to all the NFT communities that I've been fortunate to be apart of for supporting it. I've been learning and loving the NFT and the web3 space for the past year now and I'm excited to discuss my journey in this realm so far with you all.
