

Should I use a grid-tie or off-grid Solar System?

A grid-tie solar system with battery back-up is the best solution if you are currently connected to the grid and want a solar back-up for grid outages. An off-grid solar system is the best solution if you do not have access to the grid and don't want to depend on a generator only. Can I still utilize my solar energy during the night?

Will Belize Electricity compensate you for excess solar energy?

The hope is that through regulations, Belize Electricity Ltd will have to compensate you for excess solar energy flowing to the grid during the day and off-set it against the electricity you are drawing from the grid at night; however, the reality today is the opposite.

Is a grid-tie Solar System a viable option?

If your monthly electricity bill exceeds BZD 500 and your energy consumption is mostly during the day, then adding a grid-tie solar system with or without battery back-up is more economically viable than going completely solar off-grid. Will my grid-tie solar system stay on during a grid outage?

What is a grid-tie Solar System?

A grid-tie solar system is the best solution if you are currently connected to the grid and want to save on your utility bill. A grid-tie solar system with battery back-up is the best solution if you are currently connected to the grid and want a solar back-up for grid outages.

What is off-grid solar?

It provides solar energy for your daytime needs and allows surplus energy to flow to the integrated batteries, providing peace of mind at night or during power outages. Off-grid Solar empowers you with self-sufficiency and independence. Discover the perfect solution for your remote cabin, communication site or island retreat.

Currently, Belize is seeing a rise in the purchase and use of Solar PV systems, for both grid-connected and off-grid use. Two major Solar PV companies in the central corridor of Belize have installed an average of 140 kW annually over the past three years, almost equally split between on-grid and off-grid. One company has done

It is the most user friendly solar I have ever seen. I love it. Don't buy the junk off Amazon. Those little solar generators only offering 700 watts won't help you with running an a/c. For those saying you have to shell out big bucks like \$15,000 upward for a solar system that can run a 5000 BTU a/c, that's not the case anymore.

With a little planning and research, you can have a solar system that will provide you with clean, renewable energy for many years to come. To learn more about building off-grid in Belize reach out to us and we can help ...
