The best power backup for a WiFi router is an Uninterruptible Power Supply (UPS). A UPS is a device that provides emergency power to a load when the input power source, typically mains power, fails. It also provides protection from power surges and spikes, which can damage a router. A UPS will typically provide backup power for up to several ...

Oakter's Mini UPS is a tiny device designed to deliver 4 hours of backup time, especially to your home or office's routers. Even a second of load-shedding could determine a hefty sum of stakes in some situations, and hence, an internet power backup (coupled with UPS or inverter) is a massive relief. Furthermore, this doesn't come at a compromised speed as there is zero lag in ...
