A solar generator with at least a 2,000Wh (2 kWh) battery will run a full-size refrigerator for one day. To run the fridge for several days on end, you will need to have a solar input of at least 400W to completely recharge the battery during the day. However, you may need to adjust your solar panel input depending on the size of your refrigerator.

3000-Watt Output/6000W Peak Portable Power Station Explorer 3000 Pro Push Start Battery Generator/1 Solar Panel Included. The Investment Tax Credit (ITC) is a federal policy in the United States that provides a 30% tax credit to support the development and use of solar energy systems, making them more affordable for residential and commercial ...

However, there is a specific way to connect solar panels to the generator depending on the number of solar panels and/or the total watts of solar. This 5-minute video demonstrates the best set up for connecting solar panels into the most popular solar generators like the Bluetti, EcoFlow Delta, Titan and more!
