

Qatar Investment Authority (QIA), the country's sovereign wealth fund, will invest \$125mn into Fluence, a global battery storage joint venture of Siemens AG and AES Corp. The investment will give QIA a 12.5% ...

The LCOE of battery storage systems meanwhile has halved in just two years, to a benchmark of US\$150 per MWh for four-hour duration projects. In an interview, BloombergNEF analyst Tifenn Brandily, the report's ...

By Yayoi Sekine, Head of Energy Storage, BloombergNEF. Battery overproduction and overcapacity will shape market dynamics of the energy storage sector in 2024, pressuring prices and providing headwinds for ...

The Inflation Reduction Act is poised to boost clean-energy investment. Those surveyed by Bloomberg point to the potential for the battery-storage sector, followed by wind, solar and green ...

In 2022, volume-weighted price of lithium-ion battery packs across all sectors averaged \$151 per kilowatt-hour (kWh), a 7% rise from 2021 and the first time BNEF recorded an increase in price. Now, BNEF expects the ...

The growth in LFP's market share is made possible by a scale-up in manufacturing capacity led by Chinese battery makers. Battery makers outside China, many of which historically specialized in nickel-based lithium-ion batteries, are also looking to start manufacturing energy storage system (ESS) products using LFP.

BloombergNEF has developed a tiering system for battery cell makers and system integrators. Based on bankability as evidenced by deployment, the system is designed to create a transparent differentiation between the hundreds of stationary energy...

Affordable, reliable energy storage is a critical component of the low-carbon energy system of the future, and the falling costs of battery technology have led to an acceleration in storage deployments for renewable integration and other applications. However, rising materials costs have erased three years of hard-won gains, driving up the costs of energy storage [Read More](#)

Northvolt AB filed for bankruptcy protection in the US after a desperate bid to secure rescue funding fell short, leaving the struggling battery maker with just one week's cash in its accounts.

More than 170,000 visitors are expected to descend on a Shanghai convention center over three days this week to view battery assemblies ranging in size from a shoe box to a shipping container. On ...

Norway's Morrow Batteries AS is forging ahead with a plan to make battery cells while sidestepping fallout from a crisis at its much-larger Swedish peer Northvolt AB, whose plan to scale fast ...

Study shows that long-duration energy storage technologies are now mature enough to understand costs as deployment gets under way. New York/San Francisco, May 30, 2024 - Long-duration energy storage, or LDES, is rapidly garnering interest worldwide as the day it will out-compete lithium-ion batteries in some markets approaches and as decarbonization ...

GCube Insurance, which covers more than 100 gigawatts of renewable energy globally, including about 40 battery storage sites, said in a new report that underwriters remain cautious of battery storage facilities because the technology is in the early stages of mass utilization. There were 22 accidents at battery storage plants in 2022, compared ...

H.E. Saad bin Sherida al-Kaabi, Minister of State for Energy Affairs, The State of Qatar; President and CEO, Qatar Petroleum; Patrick Pouyann&#233;, Chairman of the Board and CEO, TotalEnergies; Ben ...

theion CEO Dr. Ulrich Ehmes discusses how the startup's sulfur crystal battery is aiming to shake up the energy storage market in a conversation with Bloomberg's Farah Elbahrawy at Bloomberg ...

3 ???&#0183; 2024 saw that dynamic shift, with accelerating battery deployment attracting the attention of battery producers as they expanded their operations into battery system integration. The trend is borne out in BloombergNEF data. ...
