

Will Bolivia sell \$1 billion in green bonds in New York?

Bolivia is weighing the sale of as much as \$1 billion in so-called green bonds in New York this year, according to the country's finance chief. The Andean nation is in discussions with Wall Street to sell debt earmarked for mining lithium -- a key component in electric-vehicle batteries, Economy Minister Marcelo Montenegro said.

Why is Bolivian brine so expensive?

Bolivian brine has high levels of magnesium, which make its lithium less pure and costlier to produce, while the nearest port is at least 500 kilometers away in Chile. A history of political and social unrest and a state-led approach to natural resources have also deterred private investors, as has the recent plunge in prices.

Is Bolivia still a good place to live?

For a nation of just 11.3 million, Bolivia still has outsized natural resource potential that could resolve the current economic pain. There are some wildcatters and criminal groups who don't pay taxes and produce billions of dollars worth of gold.

Are Bolivians getting squeezed?

And Bolivians are getting squeezed. Any fallout from what happens would only build on the chaos in a region already going through unrest and add to the flood of migrants that has created social tension throughout the Americas. In neighboring Argentina, more than half of the nation now lives below the poverty line.

Can Bolivian brine be extracted?

But while Bolivians have long anticipated a bonanza from the metal, they have yet to extract it in commercial quantities. Bolivian brine has high levels of magnesium, which make its lithium less pure and costlier to produce, while the nearest port is at least 500 kilometers away in Chile.
