

Who is Borri?

Borri is a global provider of single phase and three phase UPS systems for industrial and critical applications. | Borri is a global provider of power protection solutions for harsh industrial, demanding commercial and ICT applications with over eighty years of experience in developing, manufacturing, and supplying uninterruptable power systems.

Who is Borri & scientechnic?

Borri is a global provider of power electronics systems and solutions for harsh industrial and demanding critical power requirements. This year marks a decade of Scientechnic's successful partnership with Borri, and the company looks forward to many more years of mutual growth and success.

What makes Borri unique?

Borri's R&D vast expertise in all facets of firmware, power electronics and mechanical design provides innovative solutions for tomorrows problems in Industrial and Critical Power applications. The company prides itself on its first-class service and superior engineering disciplines.

Is Borri a Legrand company?

Borri is a brand of Legrand, a publicly traded company and a global specialist in electrical and digital infrastructures, offering high-value-added products and solutions for commercial, residential and industrial buildings.

How do Borri rectifiers work?

Borri rectifiers, contained in the PCM (Power & Control Module) work in parallel with the PV DC source to compensate, stabilize and take over the PV DC power supply to maintain hydrogen production. This ensures the electrolyser maintain the optimal operating V/I curve.

How can a Borri rectifier improve the performance of a solar system?

With the increasing need to reduce carbon footprint and energy costs, modern electrolyzers can now be powered by DC electricity from renewable sources like PV or wind power, which, when combined with the high-efficiency Borri rectifiers, can significantly improve the system's overall performance.
