What is the Li setting on a Growatt inverter?

The Li setting is for a Growatt battery that communicates directly with the inverter. (As far as I know, Growatt has never actually released the battery that does this but I believe there are 3rd party batteries that will.... maybe it is EG4..??). You should use the custom setting. It will do everything you need/want Click to expand...

Do EG4 & Sok rack batteries work with Growatt inverters?

It would make turning things on slightly easier (you have to hold the RST buttons for a few seconds on the batteries from their off state to activate the pre-charge routine). The EG4 and SOK rack batteries both advertise as being able to communicate directly with a Growatt inverters, that's why I asked about the "Li" setting.

Is Growatt responsible if I don't obey the manual?

9 Product Liability Growatt is not responsible for the incident caused by not obeying the Manual. Before using the battery, you should read the specifications, safety information and operation instructions carefully to learn its application method and scenarios.

Why does a Growatt Charger stop charging?

If a Growatt Charger stops charging when it hits the voltage, it is in a lower state of charge than if it went into an accumulation mode till the current got to zero. (I do not know the specific behavior of Growatt chargers, but since they can support lead-acid batteries, I would assume there is an accumulation phase.) My recommendation is to experiment with it.

Growatt has announced the launch of a one-fits-all APX HV battery, incorporating innovations in performance, operation, protection and installation.. Integrated with novel soft-switching parallel connection technology, the new product delivers more energy by eliminating the effect of mismatch between packs, enabling each module to fully charge and discharge independently.

Go to the "Battery first (Solar Only Backup)" section and select "Ac Charge" to "On". Then set your time slot to be 00:30~04:30 in your case. You may also not want the batteries to charge up to 100%, so that there's capacity for your panels to ...

ARK family offers flexible energy options for single/three phase, hybrid/ac-coupled, and battery-ready solutions for different scenarios, which adopts Cobalt free LiFePO4 chemistry, together with multiple level protection from BMS and inverters to ensure its extreme safety and reliability, excellent performance, and a long lifespan.

Unless you are using the Growatt lithium battery, you do not use the lithium settings in the Growatt unit, nor the 485 comm port for use with the GW BMS. Instead you will use the USE configuration and set the unit to your own specifications. You can find specs others have used in the forum, it depends upon your system battery bank.

My Fellow Technocrats, please advise if anyone knows or could share what the correct BMS protocol on the growatt inverter will be for the SVolt 48 V batteries. Li mode on program 5 ranges from L01 to L99....not sure ...

Growatt also offers customers its ARK XH battery system for a whole package of battery-ready solutions. The battery pack has a modular design, enabling easy installation and connection to the inverter, with its Lithium-iron-phosphate (LFP) material ensuring high stability and security as well as enhanced durability.

Global distributed energy solution provider Growatt adds AXE LV battery system to its smart energy product portfolios, expanding market reach to meet the growing demand for residential off-grid lithium battery storage systems.
