

Does Cabo Verde have electricity?

Access to electricity in Cabo Verde reached 93% in 2018 from 87.1% in 2012 though in rural areas access remains below the national average (83.1%). Renewable energy accounts for 20.3% of total supply and an electricity sector Master Plan (2018-2040) was designed to help achieve 50% of renewable energy generation by 2030.

What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.

Does Cape Verde have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cape Verde: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
