how it might be developed to benefit the energy sector. The work presents the cumulative thinking of the consortium of Arup, Energy Systems Catapult and the University of Bath, along with the 100+ individuals and organisations that were consulted in the co-creation of what has now become the concept of a data sharing infrastructure.

The Automatic Asset Registration (AAR) provides an opportunity to digitalise the energy system. AAR was initially conceived of by the Energy Data Taskforce and the Energy Digitalisation Taskforce who called for "the coordination of Asset Registration" of Low Carbon Technologies (LCT). The 2021 Smart Systems and Flexibility Plan and Energy Digitalisation Strategy ...

Philip New left the position of CEO for the Energy Systems Catapult recently. Here he looks back on it becoming a critical part in the UK's energy jigsaw - and what the future may hold.

Network impact data is then fed into the Catapult's market emulator, created by our Systems Integration team, which can model and simulate various energy system conditions and test out different network pricing mechanisms that might be used in future - such as dynamic or RAG pricing. The Living Lab homes might then receive a price or ...
