

The cost per kWh from a battery is about 40-60¢ per kWh (take the total cost of the batteries and divide it by the lifetime maximum kWh throughput of the battery). If you have the money, sure, do it. Another thing to think about is your EV will eventually be your home backup battery. You can already do it today with a Ford F150 Lightning.

Looking for the cheapest cities to live in Japan to move to Japan? Here's a list of the most affordable Japanese cities to live in. Find out the cost of living, average rent, and more about these cheap Japanese cities. Check it out! Forget Tokyo's neon and embrace serene escapes - Japan's hidden gems offer a budget-frie

The new process will add couple of extra steps the next time I visit Japan. Last couple of times, I just pack and tape up my large boxes, drop by the closest PO, have them weight it, use the slowest and cheapest Surface Shipping, and it took the packages a month or 2 to get to US. Which by that time, I already back home to receive them.

If you're ever buying batteries in Japan, there are different codes they use to distinguish battery sizes: *I'm basing these on the batteries used in America. I'm not really sure about batteries worldwide.* AMERICAN/JAPANESE BATTERY SIZE EQUIVALENTS. AA is the same as LR6XJC AAA is the same as LR03XJC C is the same as LR14EJC D is the ...

Tools can be cheaper but the US has a lot of better deals with extra batteries thrown in etc. Japan has none, ever. Japanese and American batteries are 100% cross compatible. Both LXT and XGT. Any specific questions? I'm in Japan.

If you're ever buying batteries in Japan, there are different codes they use to distinguish battery sizes: *I'm basing these on the batteries used in America. I'm not really sure about batteries worldwide.* AMERICAN/JAPANESE BATTERY ...

* - As of writing, they didn't have a price listed for the S22, but it's likely they can handle repairs. Smartphone Hospital. Smartphone Hospital has nationwide coverage from Hokkaido through to Okinawa. There are plenty of "hospitals" in Tokyo including branches in Akihabara, Shinbashi, Shinagawa, Shinjuku, Takadanobaba, Kinshicho, Shibuya, Ikebukuro, ...

The other problem in the home battery market is that by now every EV should provide vehicle-to-home/grid. Hyundai, Kia, Nissan and Ford are supposed to have systems now, but I'm not sure how they work and in the case of the first 3 I'm not sure they are available in the USA. The most cost effective solution would be a vehicle-to-home/grid system.

The problem for home use is that if you are 100% off grid, you'll be doing deep cycling of the cells, that will be harder on the cells than partial cycles. e.g; Doing 40-80% cycles is several fold less stressful than 10-100% cycles. ... it does not make much sense going 100% off grid at least not at current battery prices and performance.

*Prices reflect the federal tax credit but don't include solar panels, which you'll need to keep your battery charged during an outage. The difference between whole-home and partial-home battery backup systems is ...

Here, you can find new and used products and the major home electronics retailers in Japan, Yodobashi Camera, BicCamera, Yamada Denki, and Janpara.
