

How has Chile accelerated its energy transition?

Despite its historic ties to fossil fuels and copper mining, Chile in recent years has accelerated its energy transition through broad-based political support, private-public partnerships and innovative green technologies.

Why is Chile getting support from the IBD?

Chile is also receiving support from the Inter-American Development Bank (IBD) to accelerate its use of clean and sustainable energy sources and promote equal pay and gender parity within its renewable energy sector.

Why is Chile building a new power line?

High-voltage transmission towers in the Atacama Desert in northern Chile. A new 1,342-kilometre power line is being planned to help connect solar and wind energy projects to the country's grid. (Image: Jon G. Fuller /Alamy) Chile is set to build its longest power transmission line, as it looks to support its transition to clean energy.

How can public-private partnerships accelerate Chile's energy transition?

Public-private partnerships have been key in accelerating Chile's energy transition, especially when it comes to the country's green hydrogen market. Green hydrogen, a clean energy source that splits water into hydrogen and oxygen using renewable electricity, sits at the heart of Chile's energy transition.

What is Chile's energy policy?

According to Chile's National Energy Policy of 2021, energy generation is responsible for 77% of the country's greenhouse gas emissions.

Why are solar panels important to Chile's green hydrogen industry?

Solar panels pictured in Chile's Atacama Desert are crucial to the country's green hydrogen industry. Chile has set an ambitious goal of converting 70% of its total energy consumption to renewables by 2030 and pledged to become carbon neutral by 2050.

Aban Energy Company was established in Tehran and is present all over the country. In addition, Aban Energy works exclusively with several sales and service partners throughout Iran. This company has employed expert workers all over Iran in the control parts of precise cooling devices.

Somos una comercializadora y productora independiente de energía a a partir de fuentes renovables, limpias e ilimitadas. Toda nuestra energía es producida en plantas eólicas y solares que desarrollamos y operamos nosotros mismos.

Grenergy en Chile. Trabajadores Chile. Empleo local. En el marco de los diferentes proyectos desarrollados por Grenergy, se ha procurado priorizar la mano de obra local. Por ejemplo, para el PFV Gran Teno 200 MW
