

Will shell buy Daystar power?

Global oil giant, Shell, has acquired Daystar Power, a West African solar power company for an undisclosed amount of money. Daystar's cofounder, Christain Wessel said Shell will help it increase its installed solar capacity to 400MW by 2025.

How many solar installations does Daystar power have?

According to Daystar's website, it currently runs more than 300 power installations with an installed solar capacity of 32MW. It aims to reach 400MW of solar by 2025. "We have seen booming demand for solar energy in the African markets where we operate," said Jasper Graf von Hardenberg, CEO and co-founder of Daystar Power.

How much money has Daystar raised from investors?

Image Source: Daystar So far, Nigeria-based Daystar has raised \$92 million from investors, including \$4 million in debt financing from SunFunder and a \$20 million loan from International Finance Corporation. Wessels told TechCabal they were seeking an investment from Shell before acquisition talks began last year and culminated in this acquisition.
