

Where is Corvus Energy made?

Corvus Energy has manufacturing and engineering in Porsgrunn, in Bergen, Norway, and in Richmond, British Columbia. In January 2023, Corvus opened a maritime battery manufacturing plant in Fairhaven, Washington. The company has a global sales and service network in addition to a Joint Venture with Sumitomo in Japan.

What makes Corvus Energy unique?

Technological excellence in combination with Maritime DNA has made Corvus Energy pioneers in their field with the highest number of installations worldwide. We believe the combination of clean fuel and fuel cells together with batteries is the solution to reach the goal of zero emissions by 2050 for the marine industry.

Why did Toyota invest in Corvus Energy?

This investment will provide Corvus with even fuller access to Toyota's cutting-edge expertise in both fuel cells and battery technology, strengthening Corvus's ability to bring innovations to a rapidly evolving industry. Corvus Energy is the leading supplier of zero-emission solutions for maritime, offshore and port applications.

Where are Corvus Energy batteries used?

Many of the ground breaking electric and hybrid projects for the marine industry powered by Corvus Energy battery systems are in Northern Europe: MF Ampere, the world's first fully electric car ferry; TESO Texelstroom, world's greenest passenger ferry; and the SELFA EL-MAX, the world's first all-electric fishing boat.

Bergen, Norway and Tokyo, Japan - 21 April 2021 - Corvus Energy, the global leading supplier of zero-emission solutions for the maritime industry has signed a Joint Venture Agreement with Sumitomo Corporation. The Joint Venture will do marketing, sales and after-service for Corvus Energy's battery systems and fuel cell systems in Asian market, mainly in ...

Bergen, Norway and Vancouver, Canada, April 4, 2022--The Corvus Energy Hydrogen Fuel Cell System developed through the H2NOR project has received Approval in Principle (AiP) by DNV for its groundbreaking safety solution enabling simplified placement of the system inside a ship's hull. This is the first fuel cell system (FCS) designed to be inherently gas ...

20 June 2024, BERGEN - Corvus is pleased to share that the company has received the prestigious Norwegian Technology Award 2024.
