Costa Rica is counted among the stable and fast growing economies of Central and South America. At four to eight per cent per year, growth in energy demand has been correspondingly high. To date, Costa Rica has been in a position to cover around 80 % of its electrical power from hydro-electric plants.

Costa Rica has a strong focus on renewable energy, with 99.78% of the energy output coming from renewable sources in 2020. However, solar power currently accounts for less than 1% of the country's energy production. In November 2021, Costa Rica approved a bill that allows individuals to produce their own renewable electricity and sell their surplus energy.
