

Why is the Cuban electric power system losing its operations?

The so-called thermal generation is the basis of the Cuban Electric Power System, but it suffers from the handicap of an aging and overexploited infrastructure. In addition, it has been losing part of its operations, following the withdrawal of the Mariel, Rent#233;, Nuevitas units and the historic Tallapiedra plant in Havana.

What happened to Cuba's electricity grid?

REUTERS/Norlys Perez HAVANA - Cuba's national grid collapsed on Friday, leaving the entire population of 10 million people without electricity and underscoring the precarious state of the Communist-run country's infrastructure and economy. Restoration of service is under way but long-term challenges will remain.

Why are there so many power outages in Cuba?

Widespread power outages, in some areas lasting up to 24 hours, stem from outdated infrastructure, lack of investment, and management issues. This article explores the evolution of this crisis from July to November 2024. As the year began, Cubans observed a rise in power outages, particularly in the eastern provinces.

How has the energy crisis impacted Cuba in 2024?

The energy crisis in Cuba has deepened throughout 2024, severely impacting daily life and the national economy. Widespread power outages, in some areas lasting up to 24 hours, stem from outdated infrastructure, lack of investment, and management issues. This article explores the evolution of this crisis from July to November 2024.

What happened to power in Cuba?

As the year began, Cubans observed a rise in power outages, particularly in the eastern provinces. By March, the Antonio Guiteras Thermal Power Plant experienced breakdowns, leaving several provinces without power. The situation worsened in May and June, with some regions enduring outages for up to 12 hours daily.

What happened to Cuba's power plant?

The situation came to a head on Friday, when Cuba's largest power plant malfunctioned, joining several smaller plants already offline. Foul weather had also stalled the arrival of fuel from tanker ships offshore, starving the island's power plants. The combination prompted the entire grid to collapse.
