

Does Dominica have a national energy plan?

Dominica drafted a national energy plan in 2011 and revised it in 2014. The objective of the plan is to make electricity generation on the island self-sufficient by 2020 using sustainable and indigenous resources.

Can Dominica develop geothermal power?

Dominica is expected to develop more than 100 MW of geothermal power and has secured funding for early-stage investment through the World Bank's Geothermal Development Plan. The island may be able to secure additional international and private sector funding for these projects.

Does Dominica generate solar power?

Dominica has a high solar potential with a solar resource of 5.6 kWh per square meter per day. The government has installed LED streetlights (in 2013 and 2014). Dominica also has approximately 30 MW of wind power potential, some of which is under development.

Does Dominica have hydropower?

In the past, hydropower supplied 90% of Dominica's electricity. However, as population and electricity demand grew, diesel generator use increased and hydropower share diminished. Dominica Electricity Services Limited (DOMLEC) is the sole electric utility with an installed electrical generating capacity of 23.8 megawatts (MW) and a peak demand of 17.2 MW.

How much wind power is available in Dominica?

Dominica has a wind power potential of 10 MW at Crompton Point in Saint Andrew and an additional 20 MW elsewhere in the country. After reviewing nine wind studies, DOMLEC came to this conclusion.

Who owns Dominica Social Security & Light & Power?

Dominica Social Security holds a 20% share and Light and Power Holdings, a subsidiary of Emera Corp., holds a 53% share in Dominica Social Security & Light & Power. The remaining 27% is owned by employees, private citizens, and local corporations.

ELGAM ENERGY d.o.o. je 2022. ostvario ukupni godišnji prihod u iznosu od 873.594,13 EUR što predstavlja relativnu promjenu ukupnih prihoda od 655.164,77 EUR u odnosu na prethodno razdoblje kada je poslovni subjekt ostvario ukupne godišnje prihode u iznosu od 218.429,36 EUR. Poslovni subjekt je tokom posljednje dvije godine poslovao s dobiti.

Elgin Energy may be growing as it has recently attracted significant investment, indicating investor confidence and potential for expansion. The acquisition of a majority stake by Copenhagen Infrastructure Partners, a notable player in the energy sector, suggests that Elgin Energy has a strong market position and is poised for further development.

Solar energy provides electricity emission-free, reducing CO2 and reliance on imported fossil fuels. Clean, quiet, and visually discreet, solar farms create eco-friendly habitats, enhancing biodiversity. Solar energy doesn't require the input of external power, which supports national independence in fueling our future.
