A typical solar module includes a few essential parts: Solar cells: We've talked about these a lot already, but solar cells absorb sunlight. When it comes to silicon solar cells, there are generally two different types: monocrystalline and polycrystalline.Monocrystalline cells include a single silicon crystal, while polycrystalline cells contain fragments of silicon.

The use of solar energy as a renewable source of power is rapidly growing worldwide. As the solar industry continues to expand, terms like "solar panels" and "solar modules" are often used interchangeably, leading to confusion. However, while these two terms are related, they refer to different components in a solar power system.
