But then again, do you really need a tier 8? Exactly. There's rarely a reason to really bank much power at all unless your generators can't keep up with peak demands. Or to enable you to turn off generators for a while. And then having a few million in reserve is likely sufficient. Filling a tier 8 is just a fun side project.

The documentation for the Energy Core is in dire need of an update to reflect the change made in 2.0.5.154 from Awakened Draconium blocks to mostly Draconium blocks to prevent people to needlessly farm 1.1k Awakened Draconium blocks after reading the tablet.

Prior to that, I was manually tweaking the flux gate values to attempt to get close to my desired temperature, so I didn't have a specific value; I was constantly monkeying with them.
