

Will Romania increase solar power by 2023?

Econergy's 155 MWp Ratesti solar project, in Romania. During the COP28 climate summit in Dubai in December 2023, Romanian president Klaus Iohannis pledged to increase his country's PV generation capacity to more than 8 GW by 2030. That would mark a sixfold increase on the 1.39 GW of solar in Romania in 2020.

Why should we invest in Romanian solar?

Econergy identified Romania as an important European renewables player at the end of the 2010s and has become a leading developer and investor in Romanian PV. We have learned where Romania's bold commitments create opportunity, where growth is delayed, and how Romania is weathering current international challenges. Solar regulation

When will Romania's largest solar park start generating power?

Nofar is building Romania's largest solar park, a 154-MW facility in Ratesti, which will start power generation most probably in July. This project did not have to deal with the 50-ha limitation as it was in the ready-to-build phase before the rule was introduced. Andreea Gilicel, financial manager at Nofar Energy, told Renewables Now at the event.

What is Econergy doing in Romania?

Econergy has 233 MW of projects under construction in the country and a pipeline of around 2 GW in development or ready to build. We are excited to continue building in Romania. About the author: Bogdan Asanache is Econergy's country manager for Romania.
