What time does the sun rise in Cairo?

During these days, the sun in Cairo rises at 6:36. The early sunset at 16:56 makes the day currently a bit too short. The following graph shows the times of sunrise and sunset over the course of the year.

How long does a sunset last in Egypt?

The farther a country is from the equator, the more oblique the sun's path is to the horizon, causing sunset to last for a different duration. Cairo lies on the 30th degree of northern latitude and is therefore quite far away from the equator. While a sunset near the equator lasts only about 20 minutes, in Egypt, this period averages 29 minutes.
