

Elemental Energy is a locally owned and operated solar PV design and installation firm based in Portland, Oregon. Founded by graduates of the first and only accredited Bachelor's of Science degree program in Renewable Energy Engineering, our mission is to critically address the way that society uses and thinks about energy.

We enable safe and affordable fresh water on a global scale through realizing projects that provide water using desalination powered by renewable energy for people that face water scarcity in developing countries. Already 4 billion people are facing water scarcity due to population growth, an increasing water footprint and climate change effects.

Unlike thin target samples where simple comparison of elemental X-ray intensities with the calibration curves lead directly to the PIXE analysis results, the analysis of thick target samples requires additional information about proton energy loss within the target, X-ray absorption by the sample mass, secondary induced fluorescence and other ...

EDS elemental analysis is one of many non-destructive testing methods Applied Technical Services employs in our metallurgy lab. EDS, also known as energy-dispersive x-ray spectroscopy, energy dispersive x-ray analysis, or energy dispersive x-ray microanalysis, is an analytical method that evaluates the chemical and elemental composition of a sample.

NEW YORK, Sept. 14, 2023 (GLOBE NEWSWIRE) -- Elemental Clean Fuels ("ECF"), an energy development company focused on the emerging clean fuel economy in North America, today announced that it has recently closed on its first round of external financing from investors Piney Point Capital, a Racon Capital investment vehicle, and Fusion Fuel Green plc (NASDAQ: ...

Liquid fuel analysis demands an analytical technology that is capable of detecting low levels of sulfur and nitrogen. According to international standards, such as ASTM D4629 or ASTM D5453, the content of sulfur and nitrogen in fuels or light hydrocarbons has to be determined via high-temperature combustion of the sample.
