Energy storage's role in enabling decarbonisation while increasing efficiency of grids and helping to manage energy costs was at the heart of discussions at Energy Storage Summit Asia 2023. The event, held earlier this month in Singapore by Energy-Storage.news publisher Solar Media, covered a broad range of topics.

Quick background . Although Singapore has one of the most reliable electricity grids in the world, However, as Singapore looks to renewable energy and power imports to transition to a low-carbon energy system, and moves towards the electrification of its transport system, it is increasingly vital to ensure that its grid infrastructure remains stable and resilient.

Energy storage is key to the grid of the future and the topic plays a prominent role at DISTRIBUTECH International. Join us February 26-29, 2024 in Orlando to learn how utilities are using energy storage to help manage the grid. Singapore, an island and city-state, is the smallest country in Southeast Asia.

The Energy Market Authority (EMA) today launched a programme to facilitate adoption of Energy Storage Systems (ESS) in Singapore. The programme, known as ACCESS or ACCelerating Energy Storage for Singapore, was announced today by Minister for Trade and Industry Chan Chun Sing at the Singapore International Energy Week 2018.

The Energy Market Authority (EMA) has awarded \$7.8m in grants to two companies for research projects aimed at improving the cost-effectiveness and space efficiency of energy storage systems (ESS). ESS are crucial for integrating solar energy as it store and discharge electricity to address the intermittency of renewable sources and help prevent ...
