

Will Hitachi energy supply a battery energy storage system in the Faroe Islands?

Image: SEV. Hitachi Energy has been selected to supply a large-scale battery energy storage system (BESS) for a wind farm in the Faroe Islands, as the remote archipelago targets a goal of 100% renewable energy. The North Atlantic islands, between Norway and Iceland and north of Scotland, are home to about 50,000 people.

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Can the Faroe Islands be a smart microgrid?

"The energy system in the Faroe Islands is an impressive example of how all available energy resources can be integrated into a smart and innovative microgrid," says Vehkakoski.

What is the main industry in the Faroe Islands?

Fishing is, and has been for many decades, the main industry in the Faroe Islands with its products, including farmed salmon, representing more than 95% of total exports, and around 20% of Faroese GDP. "Producing fish meal and oil requires quite a lot of energy.

Will the Faroe Islands use more green energy in 2025?

Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energy and especially the potential for wind energy is quite high," says one of the islanders.

Where are the Faroe Islands located?

Far from continental Europe and surrounded by a vast sea, the Faroe Islands lie in the middle of the North Atlantic between Iceland and Norway.

Dais Energy CEO Daniel Connor speaking on a panel at last week's event in Warsaw, Poland. Image: Solar Media. BESS developer and operator Dais Energy will reach ready-to-build (RTB) status on 190MW of a 250MW Denmark project portfolio in the coming months, CEO Daniel Connor has told Energy-Storage.news.. Dais has announced a strategic ...

A gigawatt-scale factory producing lithium iron phosphate (LFP) batteries for the transport and stationary energy storage sectors could be built in Serbia, the first of its kind in Europe. ... The company has formed a strategic partnership with EIT InnoEnergy, which is an investment vehicle supported by the European Union.

Power management firm Eaton has announced a collaboration with Tesla which aims to boost the functionality and adoption of home energy storage and solar installations in North America. Go deeper ...

Energy Vault Holdings has entered an agreement with the Enervest Group to deploy a 1 gigawatt-hour battery energy storage system (BESS) at the Stoney Creek site in New South Wales (NSW), Australia. The collaboration is a significant move towards enhancing grid reliability and supporting the state's renewable energy expansion.

The remote Faroe Islands in northern Europe are to benefit from a major energy storage system, which as well as helping integrate renewable energy sources, will also operate on a commercial basis providing grid ...

Technology company Kyocera has entered a partnership agreement to build the microgrid with municipal governments of China-cho and Wadamari-cho, which are the two towns on Okinoerabujima, an island less than 100km² in area and with a population of about 12,000 people. ... Last week, Energy-Storage.news reported that the installation of a 15.6MWh ...

Energy-Storage.news also reported today on a partnership between thermal energy storage technology developer Azelio and Mexico-based industrial equipment supplier and turnkey project developer CITRUS. Azelio uses heated aluminium to store energy and the pair have signed a Memorandum of Understanding (MoU) with a view to marketing the technology ...

Energy-Storage.news also reported today on a partnership between thermal energy storage technology developer Azelio and Mexico-based industrial equipment supplier and turnkey project developer CITRUS. Azelio ...

A partnership to take on the micro-grid sector has been formed by battery maker Samsung SDI and ABB, the Swiss-headquartered power and automation specialist. The two companies announced the signing of a ...

Just before Christmas, The EU Commission approved a EUR17.7 billion (US\$19.5 billion) state aid scheme in Italy to fund the rollout of the 9GW/71GWh of new energy storage that Terna has said the country needs. Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year ...

Now the islands" power company SEV has signed a deal with Hitachi Energy for its 6 MW/7.5 MWh e-mesh PowerStore battery energy storage solution to integrate the 6.3 MW Porkeri windfarm into the local grid of the ...

The partners will now look into developing a "suitable financing concept" and look at how the project can be implemented. Siemens said energy storage technology and services provider Fluence, which was formed in 2017 as a Siemens-AES Corporation joint venture (JV), will provide the lithium-ion battery system.

The transacted vehicle will see through the construction, ownership and operation of a portfolio comprising 23 battery energy storage system (BESS) projects as well as three renovations of open cycle gas turbine (OCGT) plants totalling 0.9GW. The deal is part of Enel's partnership business model outlined in its business plan for 2024-26.

The two companies have worked together on energy storage system projects since 2020, with their first 6MW project together announced publicly in late 2021 the initial stages of their newly announced partnership, Fluence's battery storage technologies will be installed at TECO Group factories.

Andrew Blumfield from GBSL said: "We are delighted to have reached this agreement with Siemens which builds on a track record of a successful commercial partnership. The four new battery energy storage projects will support National Grid and ensure energy storage projects can continue to provide cost effective solutions to modern challenges."

Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.
