

Eswatini Energy Regulatory Authority is a statutory Energy Regulatory Body established through the Energy Regulatory Act, 2007 (Act No.2 of 2007). The Mandate of ESERA is the administration of Electricity Act, 2007 (Act No.3 of 2007), with the primary and core responsibilities of exercising control over the electricity supply industry (ESI) and regulation of generation, transmission ...

Africa-Press - Eswatini. From November 4 to 8, the Cape Town International Convention Centre will host the African Energy Week. A Russia-Africa roundtable is scheduled for November 6. It will focus on opportunities for Russian companies in the African energy sector and strategic areas of cooperation between Russia and the continent.

To ensure the long-term scale-up of sustainable energy across Eswatini, it is essential to nurture a generation capable of leading the country's sustainable future. The renewable energy sector can offer a significant ...

The director added that the Eswatini Electricity Company (EEC) is working on a number of renewable energy projects, and the regulator, being the Eswatini Energy Regulatory Authority (ESERA), is also procuring from independent power producers. She said they were all informed by the master plan.

Energy self-sufficiency (%) 72 67 Eswatini COUNTRY INDICATORS AND SDGS TOTAL ENERGY SUPPLY (TES) Total energy supply in 2021 Renewable energy supply in 2021 28% 67% 5% Oil Gas Nuclear Coal + others Renewables 0% 4% 96% Hydro/marine Wind Solar Bioenergy Geothermal 82% 49% 65% 0% 20% 40% 60% 80% 100%

The changes are driven by Eswatini's desire to improve energy security, access to reliable, adequate, and affordable electricity, and the mitigation of potential detrimental impacts on the environment because of the growing energy demand. The Eswatini Electricity Company (EEC), a state-owned power utility, owns and operates four hydro power ...

The International Atomic Energy Agency (IAEA) is assisting the Kingdom of Eswatini in its sustainable development agenda in the healthcare, agriculture and nuclear energy sectors. IAEA experts are working with their counterparts in Eswatini to design a national programme for the 2025-2026 technical cooperation (TC) cycle.

Kenya remains the continent's leading geothermal energy producer and ranks among the top 10 globally, with an installed geothermal capacity of 754MW. Geothermal energy is heat energy that comes from the Earth's crust and is a renewable energy source. It's a combination of energy from the formation of the planet and radioactive decay.

Africa-Press - Eswatini. The European Union (EU), comprising of 27 European countries, is a huge supporter of green energy and a circular economy, and has extended support valued at E135 million towards agriculture value chains through sustainable and inclusive energy investments in Eswatini.

IAEA experts are working with their counterparts in Eswatini to design a national programme for the 2025-2026 technical cooperation (TC) cycle. This collaboration will focus on building on past achievements, in alignment with the priority areas identified by the Kingdom's national development plan. These priorities include the development of a radiotherapy facility, ...

We have been active in Eswatini since 1977, where we market products and services to our business customers. We are actually the third-largest retailer in the country. Want to work in the energy industry? We represent more than 500 production, commercial and support professions in ...

Speaking on behalf of His Majesty King Mswati III at COP26, the Prime Minister of Eswatini, His Excellency Cleopas Siphos Dlamini, pledged that the country will increase the share of renewable energy to 50% in the electricity mix by 2030 relative to 2010 levels through the adoption of solar, wind, biomass, hydro, and solar water heaters ...

Early this month, EEC officially launched phase two of the geothermal steam project, which seeks to explore the potential for generating clean, renewable energy using geothermal steam, marking a pivotal step towards energy security and economic sustainability for the Kingdom of Eswatini through a feasibility study.

The policy brief presents a road plan for the Kingdom's Just Energy Transition. It seeks to link growth and development with Eswatini's Nationally Determined Contributions (NDC) pledge to generate 50% of its energy from renewable sources by 2030, as well as COP28's goal of transitioning from fossil fuels to renewable energy by 2048.

In 1993 Mr. B. G. Raghupathy and members of his family became the sole shareholders of the Company and began to expand the range of products and services range in the Power and Oil & Gas industries. On June 28, 2007 the Company name was changed from GEA Energy System (India) Limited, to BGR Energy Systems Limited.

The main challenges facing the energy sector include the reliance on power imports from South Africa; which is also facing its own power generation problems; lack of clarity in roles for procurement between the Eswatini Energy Regulatory Authority and Eswatini Electricity Company; lack of incentives to improve electricity service performance ...
