

What is the Ocean Grazer?

The Ocean Grazer is a conceptual energy collection platform, projected to house several renewable energy generation modules, including wave energy, solar energy and wind energy.

What is Ocean Grazer doing in Sellingerbeetse?

Ocean Grazer is working on developing a pilot project for sustainable energy storage based on hydropower in Sellingerbeetse. This is the first large-scale project featuring Ocean Grazer's underground energy storage technology. Read more below about Ocean Grazer's pilot project in Sellingerbeetse.

What is the Ocean Grazer energy converter?

Unveiled in 2021, the technology can be deployed around offshore wind farms or floating solar, to store excess power generated. The operating principle of the Ocean Grazer energy converter is to store potential energy by creating a hydraulic head, due to the differences in pressure between two reservoirs.

Who develops the Ocean Grazer platform?

The development of the Ocean Grazer platform has been carried out by the University of Groningen in the Netherlands, since 2014, and now by a spin-out company Ocean Grazer BV.

Does Ocean Grazer have a cavern?

Ocean Grazer's system is completely sealed, meaning we construct our "own" cavern. This eliminates risks like soil subsidence or impacts on underground fault lines. The storage capacity of the system depends on its depth. The deeper the vertical shaft can be constructed, the more energy the system can store.

How does Ocean Grazer create local jobs?

roduction of the various components and hence create local jobs. Ocean Grazer works with local partners that utilize the best-in-class production methods to minimize GHG-emissions during the production phase, recollect all valuable materials at the end of life to create a circular economy. All to minimize th
