

An intelligent battery storage system made by Commeo is a viable alternative that can reliably provide enough electricity to charge the fleet at any time. "That"s because a Commeo battery system reduces the requirements placed on the existing grid connection, thereby not only reducing operating costs, but at the same time expanding the ...

With a load capacity of 1,500 N, the frames are very stable. A total of 45 battery blocks, each with 1.5 kWh, are compactly housed in a rack inside the battery storage enclosure less than 70 cm wide. The remaining space is available for the Commeo control technology, climate control, and other built-in components.

The Commeo energy storage blocks have standardised external dimensions and interfaces. The battery cells inside the blocks, however, can be interconnected in a number of different ways and different conductivities can be achieved. As a result, the Commeo modular system contains blocks designed for both parallel and serial connection.

Energy storage from Commeo From blocks to cabinets to containers - Commeo provides you with unprecedented flexibility to build a sustainable and economical energy supply. ... We develop and produce our battery systems and energy storage solutions in-house, allowing us to respond to your requirements in a self-determined and flexible manner ...

Commeo batteries are essential. Together, we enable self-sufficient energy supply for industrial and commercial companies. Managing Director ElectroFleet GmbH Robert H&#228;rtel With Commeo, we found a competent partner for our ...
