

Is Finland energy efficient?

On an international scale, energy production and usage in Finland are efficient. Energy-intensive industries have long played a large role in the Finnish economy, spurring the development of efficiency-driven energy systems. Finland is a world leader in smart grid technology.

What does the IEA think about Finland's Energy Policy?

The IEA takes a positive view of Finland's energy policy and the achievements of recent years, which include significant construction of wind power, development of heat storage, deployment of new nuclear power, progress made in the final disposal of nuclear waste, and the enshrining in law of the 2035 climate neutrality target.

Is Finland a good country for energy R&D?

In 2020, Finland ranked fourth among IEA member countries for government budget allocations on energy R&D as a share of GDP and there is a push to develop new and emerging energy technologies to drive energy transitions in hard-to-decarbonise sectors and end-uses, especially industry and heavy transport.

Will Finland have a hydrogen economy in 2023?

As mentioned, the hydrogen strategy published in June 2023 points the way towards a hydrogen economy in Finland. The last 5 years have made energy security a big theme in the national energy debate, mostly due to the Russian invasion of Ukraine but also some natural development in the energy sector.

Does Finland have a battery supply chain?

Finland's government sees critical mineral production and the battery supply chain as promising areas for economic development that also support energy transitions. Finland has large deposits of cobalt, nickel, lithium, graphite and other critical minerals - and is home to the only company outside China supplying cobalt for lithium-ion batteries.

What is Finland's energy demand?

Finland's energy demand has fluctuated between 1 007 PJ and 1 114 PJ between 2005 and 2021, most of which is consumed by the industrial sector. Finland has achieved its 2020 energy efficiency targets for primary energy consumption (PEC) and final energy consumption (FEC).
