

Can a hydrobox supply electricity to off-grid Kenyan villages?

Together, Poelmans and Magiro developed HydroBox - a power station in a shipping container - to supply electricity to off-grid Kenyan villages. Having already installed five HydroBox stations in Kenya's Muranga County, they aim to provide electricity to a million Kenyans by 2027.

Will a million Kenyans get electricity by 2027?

Having already installed five HydroBox stations in Kenya's Muranga County, they aim to provide electricity to a million Kenyans by 2027. Although 70% of Kenyans can access electricity, many people in rural areas are still without a supply.

What does hydrobox do?

At Hydrobox, we provide affordable, reliable and sustainable power in regions that do not have this today to enable progress and prosperity. We do this by using small run-of-river hydropower plants, that have minimal impact on the environment and generate maximum power output. Why do we do it?

What makes hydrobox unique?

Small hydropower remains the most efficient, affordable, and sustainable source of energy. At Hydrobox, we combine proven technology with a smart business model to ensure maximum impact. Above all, "Stronger together" is our core belief, as partnership lies at the very heart of our DNA. What sets us apart?

Why is hydrobox a good choice for small businesses?

It has also enabled the company to grow its operations, creating more than 30 permanent jobs. Economic benefits extend to the wider community too: an affordable and reliable electricity supply in the villages served by HydroBox has enabled small businesses to expand and take on additional staff.

How did hydrobox get financed?

The advisor put HydroBox in touch with the crowdfunding company Bettervest, which successfully closed multiple deals totaling EUR 835 thousand, enabling the building of its flagship hydropower plant in Gitugu. A co-advisor also helped HydroBox produce sophisticated finance models to apply for finance from DFIs and other institutional investors.
