FMT Group is known as a professional European diesel generator, with more than 20 years of experience in the power electronics business. Our head office & production line are located in Tirana, the capital city of the Republic of Albania. FMT GROUP is one of the leading Genset manufacturers in Albania. ENERGY POWER ENERGY POWER 10

A diesel generator is the combination of a diesel engine with an electric generator that converts the mechanical energy to electrical energy. Diesel, gasoline and natural gas engines are commonly preferred to provide the mechanical energy. ... Standby power generators are most often used in emergency situations, such as during a power outage ...

Synonymous with versatility and safety, TWIN-ON GENSET encloses two separate power generators within a single soundproof enclosure that enables the 2 genset to act as one generator on the same chassis. The two generators can be used simultaneously for increased power production or individually. This principle enables easy repair or maintenance.
