

This regional report provides a ten-year market outlook update (2024 to 2033) for Europe's commercial, community and industrial (CCI) energy storage segment. It covers the current and emerging drivers and barriers, key market trends, policy updates and capacity outlooks for 20 European countries.

The global energy storage market is set for another record year. BloombergNEF expects 69GW/169GWh of additions in 2024, up 76% in gigawatt-hours from 2023. China continues to lead installations thanks to provincial co-location mandates, but a slight...

Based on bankability as evidenced by deployment, the system is designed to create a transparent differentiation between the hundreds of stationary energy... BNEF Energy Storage Tier 1 List 4Q 2024 You must login to view this content.

This regional report provides a ten-year market outlook update (2024 to 2033) for Europe's commercial, community and industrial (CCI) energy storage segment. It covers the current and emerging drivers and barriers, key ...

The falling costs of grid-scale battery energy storage system (BESS) technology, a topic that has been much discussed recently on Energy-Storage news, will support growth, BNEF said. It found that as of February 2024, a 2-hour duration turnkey BESS in China cost an average of US\$115/kWh, a 43% decrease from a year before.

India is taking steps to promote energy storage by providing funding for 4GWh of grid-scale batteries in its 2023-2024 annual expenditure budget. BloombergNEF increased its cumulative deployment for APAC by 42% in gigawatt terms to 39GW/105GWh in 2030.

New Energy Outlook 2024: China. You must login to view this content. Login China is already the world's largest investor in the energy transition and is aiming to reach carbon neutrality by 2060. But this target could be more ambitious to help the world get on track for the Paris Agreement's goal to limit global warming to...

In its 1H 2024 Corporate Energy Market Outlook, global PPA volumes increased from 41GW in 2022 to 46GW in 2023, representing a 12.2% increase. Of the global volumes, the US, Canada and Latin ...

As reported by Energy Storage News, analysis firm EnergyTrend has forecast that a "surge" in global large-scale energy storage system deployments is likely in 2024. Looking ahead in 2024, TrendForce anticipates the global energy storage installed capacity to reach 71GW/167GWh, marking a 36% and 43% year-on-year increase, respectively, and ...

BNEF separated capacity as "undefined" in the technology mix outlook for the first time to address capacity being built under "other" applications, which includes long-duration energy storage (LDES). Within LDES, energy storage technologies other than lithium-ion and sodium-ion batteries will play a role, including non-battery ...

BNEF predicted in its 1H 2024 Energy Storage Market Outlook report that from an installed base of 4GW/10GWh at the end of 2022, Japan will go to about 10GW/27GWh of cumulative deployments at the end of 2030. ... (NEM) supports a stronger battery revenue outlook. US solar and storage project progress for Pine Gate, Avantus, Arevon in Western states.

At BloombergNEF's 2024 New York Climate Week event, we heard from industry leaders, policymakers, financiers, and innovative thinkers on strategies to mobilize capital and accelerate the transition to net-zero. BNEF experts presented research insights focused on scaling renewables, zero emission commercial vehicles, and our New Energy Outlook ...

The global energy storage market is growing faster than ever. Deployments in 2023 came in at 44GW/96GWh, a nearly threefold increase from a year ago and the largest year-on-year jump on record. BloombergNEF expects 67GW/155GWh will be added in 2024,...

It's a big week for the global energy transition. Major governmental players, representatives of international organizations and the private sector, and academic researchers are heading to Foz do Iguaçu, ...

This regional report provides a ten-year market outlook update (2024 to 2033) for Europe residential energy storage. It covers the current and emerging drivers and barriers, key market trends, policy updates and capacity outlooks for 20 European countries.

The Transition Metals Outlook is BNEF's annual long-term outlook for the role of metals in the energy transition. It empirically determines how the shift to a low-carbon economy will drive demand for metals and answers the question of ...
