

# French Southern Territories solar plate kit price

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Does France's auction mechanism lead to cheaper solar energy?

The French energy regulator says in a new report that France allocated about 5.55 GW of PV capacity through its auction mechanism for large-scale solar between 2011 and 2013. Despite falling solar module prices, the auction mechanism did not lead to cheaper PV electricity or lower project costs. From pv magazine France

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: Can you have solar panels on homes in historic areas of France? You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs EUR180.

Are French solar installations bolstered by a new law?

Beyond falling prices, the IEA PVPS report said solar installations were bolstered by the measures introduced in the French government's Law for the Acceleration of Renewable Energies which came into force in 2023. A requirement that competitive tender winners share some of the added value with locals.

Do car parks need solar roofs in France?

A requirement that competitive tender winners share some of the added value with locals. Car ports and car parks have become a significant driver of solar adoption in France. In November 2022, the government passed a law requiring all large car parks to have solar roofs from mid-2023.
