For H2IntraDrive, Fronius equipped two Linde P30 tow tractors with its innovative HyLOG Fleet fuel cell technology. The system consists of a hydrogen tank, a 24 V fuel cell that converts the hydrogen into electrical energy and a lithium-ion battery, which stores the generated power and acts as a traction battery.

More than just a planning tool. The Fronius Solar.creator offers a wide range of functions that go far beyond the planning of PV systems.. The tool considers all steps from choosing the right location to the finished report.. Automatic suggestions of other suitable Fronius solutions ensure that you can plan the optimum, fully comprehensive system for your customers.

BYD Battery-Box Premium can be combined with the Fronius GEN24 Plus. Working in perfect harmony When combined together, the Fronius GEN24 Plus hybrid inverter and BYD Battery-Box Premium can deliver high charging and discharging powers, meaning that the energy produced by the customer's own PV system can be optimally used and stored.

Client shall agree that Fronius International GmbH and its subsidiaries may collect, process and use personal data (such as name, address, email address), if applicable also by commissioning a service provider, for the purpose of sending information regarding products and services of any kind (e.g. by post, email, newsletter and more). ...
