

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

Is Gibraltar a sustainable country?

At present, Gibraltar is very dependent on the importation of fossil fuels for energy production and in order to reach the 2020 targets, strategies and measures based on sustainability, improved efficiency and security need to be implemented. Guidance documents are also available to aid in the implementation of Articles within the EED.

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).
