Monolithic Power Systems, Inc. (MPS) provides small, highly energy efficient, easy-to-use power management solutions for electronic systems found in industrial applications, telecom infrastructure, cloud computing, automotive, and consumer applications

Shares of Monolithic Power Systems (MPWR 4.79%) rallied hard today, up 5% as of 3:15 p.m. ET Monolithic was beaten down in November on fears of market share losses in its high-growth artificial ...

Monolithic Power Systems (MPS) is a high-performance analog semiconductor company headquartered in San Jose, California. Formed in 1997, the company has three core strengths; deep system-level and applications knowledge, strong analog design expertise, and an innovative proprietary process technology. These

We can also provide strong design support from the beginning of the design to final system testing. Our full portfolio of PSE (power-sourcing equipment) and PD (powered device) products is capable of supporting power from 13W (IEEE802.3af) to 71.3W (IEEE802.3bt).

4 ???· In other Monolithic Power Systems news, CFO Theodore Blegen sold 2,500 shares of the company"s stock in a transaction on Tuesday, October 1st. The stock was sold at an average price of \$908.36 ...

Our DC-DC power converters insure your devices dc power conversion is accurate, stable, low noise, low EMI, low ripple, and efficient while requiring minimal component count and cost. Our dc power converters are available in a wide variety of configurations, including step-down (buck), step-up (boost), and step-down/step-up (buck/boost). Our cutting-edge, cost-effective dc dc ...
