However, the production of energy from onshore wind turbines is less costly than that from offshore arrays. Therefore if, at some point in the future, economics becomes critical to decisions relating to the energy mix on Guernsey, the onshore wind energy option could be investigated further. 1.4. Current and Possible Future Territorial Limits

The Keystone State (PA) had 16 new permits. PA's top recipient was Chesapeake Energy, with six permits in Bradford County. Coterra Energy was a close second, with five new permits issued in neighboring Susquehanna County. The Buckeye State (OH) received 13 new permits, with Encino Energy (EAP) receiving eight and Ascent Resources five.

Guernsey has a long history in the performance of projects related to power and energy. Our understanding of and passion for the systems and facilities related to power transmission and distribution makes us a unique fit to assist this industry.

Guernsey performed an energy security and resiliency (ESR) assessment of the electrical energy systems, loads, and energy resources of all the mission-critical facilities at Fort Campbell. The study identified the best cost-effective projects required by the electrical systems to comply with the Army's energy security and resiliency ...
