

International finance institution the World Bank will support the development of Guinea-Bissau's first solar power plants with a \$35 million grant through its Solar Energy Scale-up and Access project.

The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable . Skip to Main Navigation Trending Data Non-communicable diseases cause 70% of global deaths

5 ???· In early March, Sinohydro signed a contract to build a 20-MW solar farm in Gardete, some 8 km south of the city of Bissau. The signature came almost a year after the African Biofuel and Renewable Energy Company (ABREC) published the tender for the work. Set up in 2019, ABREC is a holding company made up of 14 west African states that focusses on energy ...

The expected results in the energy sector are: installing 500 solar street lamps, reducing energy loss, finalising the 225-kV western backbone interconnection line in the Gambia basin and developing renewable energy. This will enable Guinea-Bissau to increase the contribution of renewable energy to its total supply mix from 0 to 36%.

The \$78.15 million investment in Guinea-Bissau's first solar power plants marks a transformative step towards a more sustainable and electrified future. By reducing carbon emissions and expanding electricity access, the project aims to address the country's significant energy challenges and foster economic growth. With support from the World ...
