What is Hassan energy's corporate responsibility work?

This is carried out through its corporate responsibility work at The Hassan Foundation. Hassan Energy has the capacity to supply and distribute high quality competitive products globally; and consistently to the required quantity, quality and environmental standards that are so critical for our clients in a range of industries.

Can Mauritania harness wind energy?

Mauritania also possesses significant potential for harnessing wind energy. The country is blessed with strong and continuous wind most days of the year, with an average wind speed of 7 meters per second. This makes it ideal for both onshore and offshore wind farm development.

Is Mauritania poised to become a major supplier of natural gas?

Mauritania is poised to become a significant global producer of natural gas and a leading player in Africa. With estimated gas reserves of 1400 billion cubic meters, the country has the potential to become a major supplier in the global market.

Should Mauritania invest in wind energy?

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to reduce reliance on fossil fuels and combat climate change.

Is Mauritania a sustainable country?

Mauritania is making great strides in the realm of renewable energy. Their commitment to a sustainable future is evident in their increasing use of natural resources to generate electricity. In 2008, a mere 1% of electricity came from renewable sources, but by 2020, that number had grown to an impressive 37%.
