A heavier rocket requires more energy, not only increasing fuel consumption but also needing more powerful engines, which are more expensive to develop, test, and maintain. Helium also has a very low boiling point (-268.9°C or -452°F), allowing it to remain a gas even in super-cold environments, an important feature because many rocket fuels ...

Sri Lanka is looking to export surplus energy to India and neighboring nations, with new projects in discussion. Foreign Minister Vijitha Herath emphasized strong India ties during a state visit, aiming to boost energy cooperation and development. Key initiatives include solar power in Sampur and a power grid connection.
