

Hydropower for home use Solomon Islands

What is a hydropower facility in Solomon Islands?

A hydropower facility to transit power system in Solomon Islands from diesel generated to clean and renewable energy. Universal grid-connected electricity supply is a major challenge across the 90 Solomon Island's inhabited islands.

Is hydropower a sustainable option for Solomon Islands?

Hydropower is also the most economically sustainable option in the long term. As Solomon Islands moves towards a cleaner, more sustainable energy future, having a mix of energy sources is the best solution for Solomon Islands; one which includes hydro, solar and battery storage.

Will Solomon Power deliver cheaper electricity outside Honiara?

The cheaper renewable energy delivered through the project will ensure Solomon Power, the country's state-owned electricity supplier, can deliver cheaper power, including outside Honiara. The total project cost is expected to reach US\$240 million over the next 5 years.

How will TRHDP benefit the Solomon Islands?

It will lower the cost of electricity supply, and diversify generation capacity towards clean, renewable sources. TRHDP will provide the Solomon Islands with reservoir capacity, giving flexibility to the power system to enable higher penetration of PV power without the need for large and expensive energy storage or diesel generators.

Is the Tina river hydro a good investment for Solomon Islands?

"The Tina River Hydro is an historic project for Solomon Islands," said Hon. Manasseh Sogavare, Prime Minister of Solomon Islands. "It will deliver cheaper power to Solomon Islanders and signals to investors that Solomon Islands is ready for large projects and partnerships."

What does TRHDP mean for the Solomon Islands?

TRHDP will provide the Solomon Islands with reservoir capacity, giving flexibility to the power system to enable higher penetration of PV power without the need for large and expensive energy storage or diesel generators. It can provide a replicable model for other Pacific SIDS to use hydropower to balance variable solar power.

"Since this project was first proposed, all parties have remained focused on delivering cheaper and more reliable power to Solomon Islanders through renewable energy," added Guido Rurangwa, the World Bank's Country Representative in Solomon Islands. "We congratulate the Solomon Islands Government and Solomon Power on reaching this ..."

Hydropower for home use Solomon Islands
